

Superior Industrial Demolition Services

Our expert team uses advanced processes and equipment to ensure successful demolition, scrap recovery, and boneyard cleanup across Alberta, British Columbia, and Saskatchewan.

Industries & Facilities Served

We've recovered 62,000+ metric tons safely and have 50+ years of experience working with companies in the following industries:

Oil & Gas

Mining

Utilities

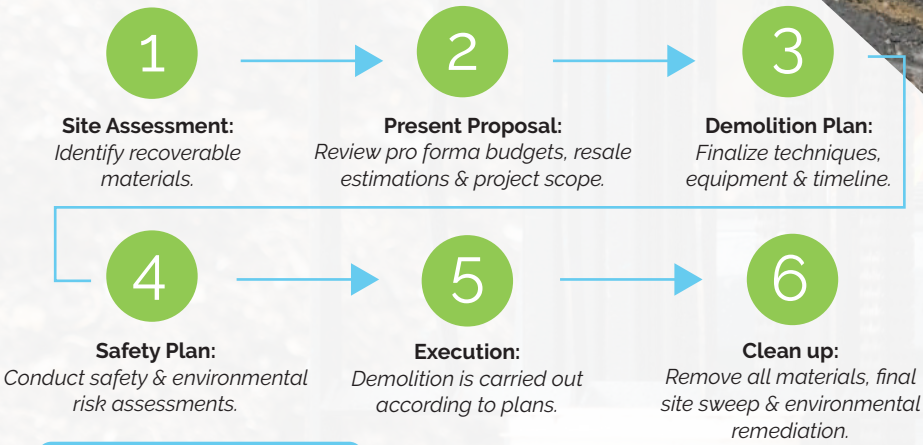

Forestry

Working with Richmond Steel Recycling

Our Process

Integrated Mill

Benefit from our integrated mill located in Washington State, eliminating intermediaries ensuring you receive top dollar on all materials. We ship via truck, rail or barge, selecting the most economical transport method, including to alternate mills, to maximize recovery value.

Safety Assurance

In addition to tailored safety plans for each of our projects, Richmond Steel executes Hazardous Materials Assessments and has industry-leading safety ratings with WCB Alberta and WorkSafe BC.

*Global 100, Dow Jones Sustainability Index and MSCI recognitions are accredited to Sims Metal Ltd., which is the parent company of Richmond Steel Recycling.

Modern Equipment

Our crews are fully equipped to act as a 'traveling scrap yard' ensuring your demolition is executed using the safest, most efficient and cleanest methods possible.

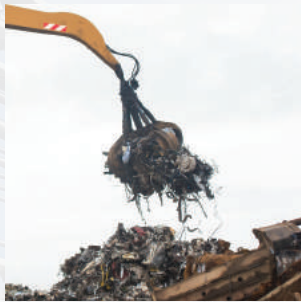

Demolition Shears

High Reach Demolition Equipment

Mobile Baling

Magnet Crane

Hazardous Material Management

Torch Cutting

Firefighting Equipment

Expertise You Can Count On

Your demolition plan is created by our on-staff professional engineers. Enjoy a dedicated project manager for every project.
